V4-GUARDRAIL SYSTEM

LONGDYES

WORKSITE SAFETY

V4-FS100 FREESTANDING

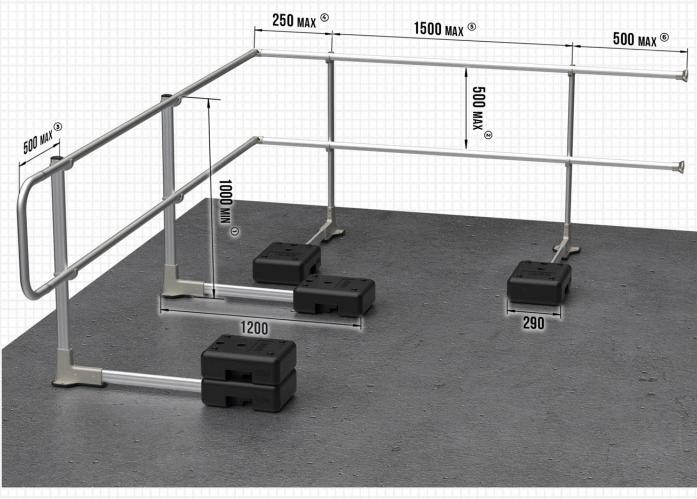

COMPLIED WITH ISO EN14122-3 : 2016 ISO EN13374 : 2013 + A1 : 2018

DIMENSIONS

FREESTANDING

The Freestanding rooftop guardrail is a system without fixing weighted by counterweights, exclusively for securing roofing decks not publicly accessible. It is recommended when it is not possible to fix the railing on the parapet or the slab. It ensures the collective protection of a new or old building.

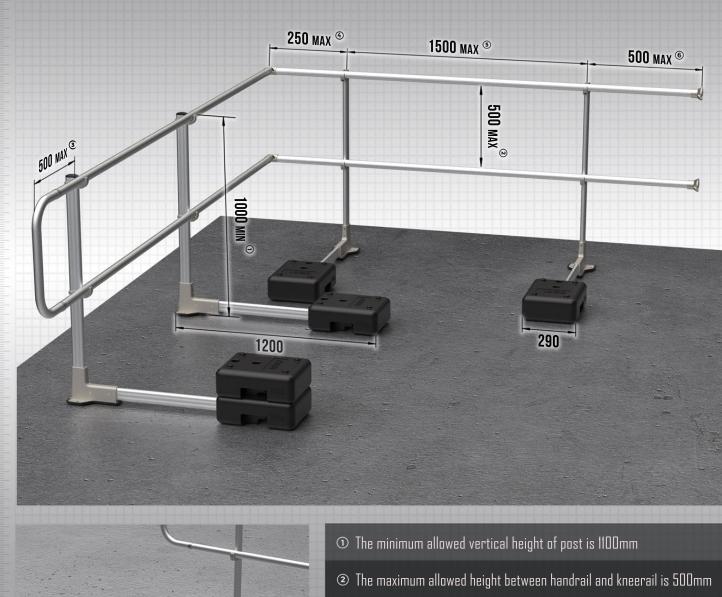

The minimum allowed vertical height of post is 1100mm
The maxmium allowed height between handrail and kneerail is 500mm
The maximum distance between final post and free end is 500mm
The maximum distance between variable corner to first post is 250mm
The maximum allowed interval is 1750mm/2500mm (ENI4122:3/ENI3874:2013)
The maximum distance between wall and first post is 500mm

FOLDABLE POST

ASSEMBLY

Sit the counterweight right on the polymer stopper, and drill the borehole on stanchion. Then screw the bolt and washer onto it

Put handrail and kneerail onto tube fixing then fix them by tightening screw

Insert upright module into base, then fix it by set screws

Use tube junction to extend the railing, once the tube and junction get connected, fixed tube to junction by tekscrew
